Lorem

On 21 April 1820, during a lecture, Ørsted noticed a compass [Dijkstra, 1982] needle deflected from magnetic north when an electric current from a battery was switched on and off.

أورستد

لاحظ هانز أورستد في 21 أبريل 1820 وهو يُعد أحد التجارب أن إبرة البوصلة تنحرف عن اتجاهها نحو الشمال عندما كان يغلق ويفتح التيار في دائرة كهربائية يُعدها.

.The proof uses reductio ad absurdum

There is no largest prime number

- •Suppose p were the largest prime number \bullet
- Let q be the product of the first p numbers
- •Then q + 1 is not divisible by any of them
- and q + 1 is greater than 1, thus divisible by some prime number \square •not in the first p numbers

.The proof uses reductio ad absurdum

.There is no largest prime number

- •Suppose p were the largest prime number \bullet
- •Let q be the product of the first p numbers ②
 - Then q+1 is not divisible by any of them $\, lacksquare$
- But q + 1 is greater than 1, thus divisible by some prime number (
 - •not in the first p numbers

.The proof uses reductio ad absurdum

There is no largest prime number

- •Suppose p were the largest prime number \bullet
- •Let q be the product of the first p numbers ②
- •Then q + 1 is not divisible by any of them \odot
- But q + 1 is greater than 1, thus divisible by some prime number \bigcirc not in the first p numbers

.The proof uses reductio ad absurdum

There is no largest prime number

- •Suppose p were the largest prime number \bullet
- Let q be the product of the first p numbers \bigcirc
- Then q + 1 is not divisible by any of them 3
- But q + 1 is greater than 1, thus divisible by some prime number \bullet not in the first p numbers

.Verbatim text

```
int main (void)
std::vector<bool> is_prime (100, true);
for (int i = 2; i < 100; i++)
if (is prime[i])
std::cout << i << " ";
for (int j = i; j < 100; is_prime [j] = false, j+=i);
return 0;
}
```

Note the use of std::.
